Concealed Cisterns on Pages 53-55

AQUAECO Flushing Solutions

- **More space:** Since concealed cisterns are built into the wall, they free up a considerable amount of bathroom space that would otherwise have been taken up by the cistern.
- **State-of-the-art technology and durability:** the AQUAECO range of concealed cisterns boasts high-tech working parts to ensure trouble-free operation. All cisterns are WRAS tested and approved.
- **Design freedom:** Homeowners and designers can pair their choice of actuator or flush plate and wall-hung or floor-standing toilet pan to perfectly complement their bathroom's particular style and design.
- **Easy to clean and hygienic:** Concealed cisterns and wall-hung WC pans provide the ideal easy-to-clean and optimum hygiene solution - no obstacles to clean around or cisterns to clean under.
- **Good for the environment:** All AQUAECO cisterns contain a dual-flush mechanism, helping to reduce running costs by saving water - using as little as two litres of water for a half flush.
- **Noise reduction:** Since the cistern is built into the wall, any noise created by the process of flushing is significantly reduced, making this an ideal solution for en-suite bathrooms. This is also a key in any hospitality requirement.
- **Strength:** All AQUAECO cistern frames are designed and built to support up to 400 kg in weight.
- **Warranty:** All AQUAECO cisterns come with an impressive 10 year warranty.

Anti-Scald Device for Shower
Thermostatic Temperature Detector
Automatically Closes when Water
Temperature Exceeds 48°C

Chrome
AQP-ECO-580-CP

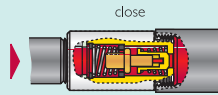

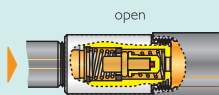

Brushed Nickel
AQP-ECO-580-NB

ANTI-SCALD DEVICE

The AQUAECO anti-scald device will maintain a safe temperature of hot water for appliances, a must for young children, the elderly and those requiring care.

By installing this device, the risk of scalding will greatly be reduced due to the automatic temperature detection, ensuring that when the water becomes too hot, the flow of water will stop.

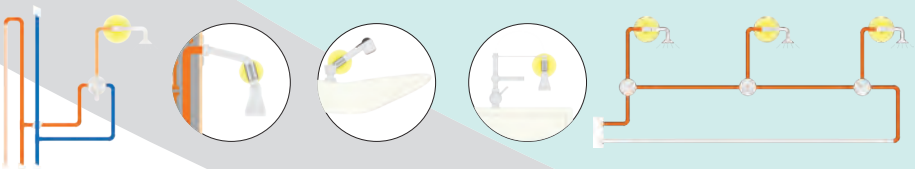

After reaching a safe temperature the device will re-activate.

- Thermostatic temperature detector.
- Chrome brass body.
- Water flow is blocked if temperature goes above 48°C.
- Self reactivation when the temperature decreases.

APPLICATIONS:

In Home Showers, Kitchen Mixers, Hospitals etc.

FINISHES:

(NB)
Brushed Nickel

Pressure Limiter
Limits the Downstream Pressure to 1 Bar
Ideal for Shower Hoses/Heads and Bidet Sprays
Available in all finishes (see below)
AQP-ECO-590-

**PRESSURE LIMITER
APPLICATIONS:**

Shower Heads/Handles

- Protection against excess pressure load due to clogged nozzles or high line pressure

Bidet Sprays

- Protection against overpressure and water hammer
- May ease operation

WATER SAVING SOLUTIONS

- Reduce your water consumption considerably using AQUAECO's range of aerators and connection fittings with flow-limiting devices.
- Minimal effect to the function of the mixer or shower; does not hamper performance.
- Installing flow-limiting devices can result in a 40-50% cut in water consumption.
