DESIGNERS

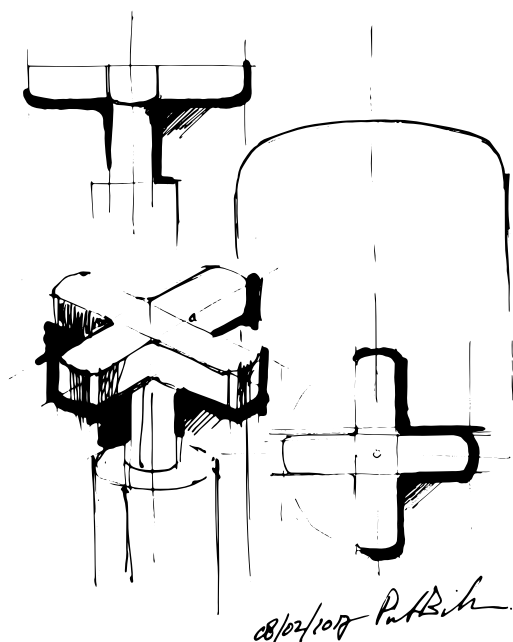

Conversation with Piet.

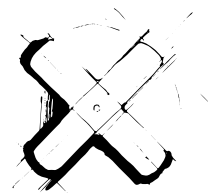

In a world already full of words, I let items speak for themselves. Their expression, on the visual and sensorial plane, is powerful even in the total absence of sound. In a world already full of items, Lira stands out for its ability to express its belonging through clear, essential and distinguished profiles. The starting point is the cross-shaped handle, characterised by a segmental polycentric arch, which was popular in the late Middle Ages among Sicilian architects who chose the Gothic-Catalan style.

L I R A

the shape of water

This detail allows Lira to convey a sense of softness and fluidity and, at the same time, provides a perception of strength and substance without appearing heavy or excessive. It is able to communicate its essence through the syncretism of function, production and use - never compromising (not even when first designed), taking into account production feasibility and the construction complexity of every detail. This ambitious concept is characterised by the desire for timelessness.

DESIGNERS

DESIGN AS A SOLUTION

MENEGHELLO PAOLELLI ASSOCIATI

Clean lines softened by sinuous profiles. Sophisticated refinement bridging the male and female word. An essential, concrete, pragmatic collection.

Full, sharp surfaces are perfectly balanced by soft, sinuous elements. The squared front lightens the overall structure, giving it a soft, contemporary appearance.

Seven sets out to become a timeless product. Based on the concept of distracted attention, its sophisticated aesthetics is never predominant, giving the bathroom a touch of distinction. Whether chrome-plated or in an exclusive Velvet black finish, the collection's understatement makes it the perfect choice in any setting.

NOBILI FACTORY

Nobili offers pure design and incomparable technological efficiency. Innovating the industry since 1954 Nobili is not only the largest brassware manufacturer in Italy, but a pioneer in sustainability and standardising the industry - resulting in the iconic company winning numerous awards.

In 1960, Nobili innovated crafting technologies in order to utilise higher quality brass for their mixers, which elevated the quality available in the industry at that time, whilst reducing wastefulness. In the 1980's Nobili developed the ceramic disc cartridge, invested in technological water-saving research and thus propelled their pioneer status in 87 countries across the industry. Having to deal with the strict rules of these foreign markets also ensures high attention to tiny details - guaranteed by important international certifications.

Today, ecosustainability is at it's height. The Suno 100,000 square metre production plant, with three hundred machining work centres is classified as a "Zero Emission Company". Because a product designed to improve quality of life cannot be born if it is destined to destroy the world in which we live.

The excellence of our design and research laboratories has produced the full-immersion Nobili Widd® 28-millimetre cartridge. The axial movement has revolutionised the structure of traditional mixers by eliminating the side cartridge block which creates an extremely clear, streamlined profile. Always providing cold water to start eliminates CO2 emissions, deriving from the accidental activation of the gas burner. This combined with the retractable aerator - with a flow of just 5 litres per minute - represents the greatest example of technological research in the entire brassware manufacturing market.

VELIS

Centro Stile Nobili

Pure minimalism. Pure technology. Pure freedom. Velis celebrates the start of a new decade through a timeless line, patently marking a border with the past: the most recent version of the Nobili Widd® cartridge with axial mixing makes for an unprecedented and extraordinary balance between form and avant-garde.

LIRA

Piet Billekens

Innovative looks and echoes of refined classic style: the Lira collection reinterprets in minimalist key the traditional concept of double-control mixer tap. Its charisma is reflected in all the range through the crossshaped handle, a detail that sums up, in the best manner, distinguished elegance that does not give up on the essential traits of contemporary luxury. Also present in the single-control variant and in a particular three-hole version in a reinterpretation of the cross-shaped handle summarized in a single line.

CARLOS PRIMERO

Piet Billekens

A perfect combination of classic and innovative elements. The Carlos Primero collection evokes stylistic and timeless suggestions of free and immortal tastes. And if the aesthetics are exciting, then so is the technology. The passion for innovation, which has always been part of the tradition of the Nobili brand, amplifies the technological evolution of the two-control mixer tap, reinterpreting the classic solutions of the past with a modern outlook.

LOOP

Piet Billekens

When the best technology is combined with aesthetics, the result is extraordinary. The pure design of the Loop collection pays exclusive homage to the technological efficiency from which it derives. Each line is a witness to absolute coherence and maximum quality in every detail. Our idea of design perfection reaches its highest peak: the Nobili Widd® 28 full-immersion cartridge sums up the best of technological research in its mere 28 millimetre diameter. Also present in the electronic variant, Loop illuminates the night with efficient intelligence.
